Odds greater than 6 to 1 or 1 to 6 mean automatic elimination.

HOW TO RESOLVE COMBAT

STEP 1: Refer to the Chart *below* to reduce battle odds to a basic odds comparison shown on the Combat Results Table. To do this simply cross-index the attacker's factor (vertical column) with the defender's factor (horizontal line). For example, battle odds of 30 to 9 breaks down to 3 to 1. (When a dash (—) appears the weaker Units are automatically eliminated.)

STEP 2: The Die is rolled once by the attacker.

STEP 3: The Die roll is matched up with the basic odds comparison to get the result of combat. For example, at 3 to 1 a Die roll of 6 means that all defending Units are eliminated. Repeat STEPS 1 through 3 for each separate battle.

To get a basic odds break down from a battle odds situation not covered in this Chart, simply divide the defender's factor into the attacker's factor and round off any fraction in favor of the defender. For examples: If battle odds are 64 to 20, 64 divided by 20 = 3-1/5 to 1 or 3 to 1; or, if odds are 20 to 64 (soak-off), 20 divided by 64 = 1 to 3-1/5 or 1 to 4.
